Milestone-2: Lightning App

Create The School Management App:

1. From Setup, enter App Manager in the Quick Find and select App Manager.
2. Click New Lightning App.
3. Enter School Management as the App Name, then click Next
4. Under App Options, leave the default selections and click Next.
5. Under Utility Items, leave as is and click Next.
6. From Available Items, select Schools, Students, Parents, Reports, and Dashboards and move them to Selected Items. Click Next.
7. From Available Profiles, select System Administrator and move it to Selected Profiles. Click Save & Finish.

To verify your changes, click the App Launcher, type School Management and select the School Management app.

Note:

App Launcher-Displays available apps.

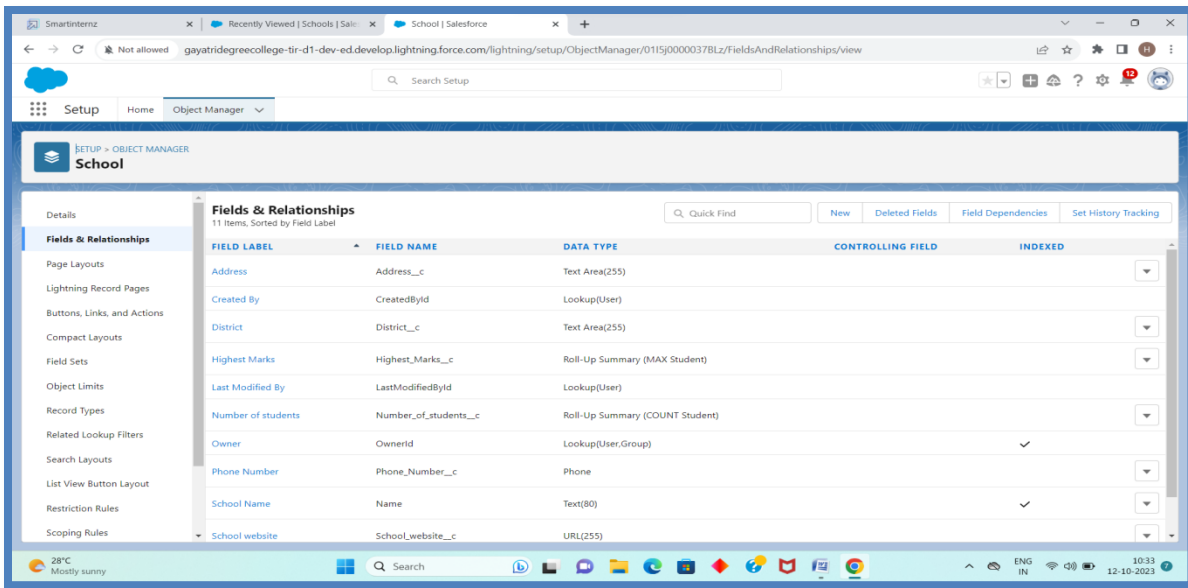

App Name-Displays the current selected app.

Navigation menu -Displays the tabs available inside the app.

Milestone-3: Fields And Relationship

Creation Of Fields For The School Objects

1. Click the gear icon and select Setup. This launches Setup in a new tab.
2. Click the Object Manager tab next to Home.
3. Select School.
4. Select Fields & Relationships from the left navigation
5. Click New
6. Select the Text Area as the Data Type, click Next.
7. For Field Label, enter Address.
8. Click Next, Next, then Save & New.
9. Follow steps 1 to 3 and create two more Text type field - District & State.
10. Create URL type field & give School website as the field label.

Now let's create the other fields and we must choose the data types of the fields carefully. Let's have a look at it.

For example, a phone number is a number field. For that we need to select the phone as data type.

Let's see this

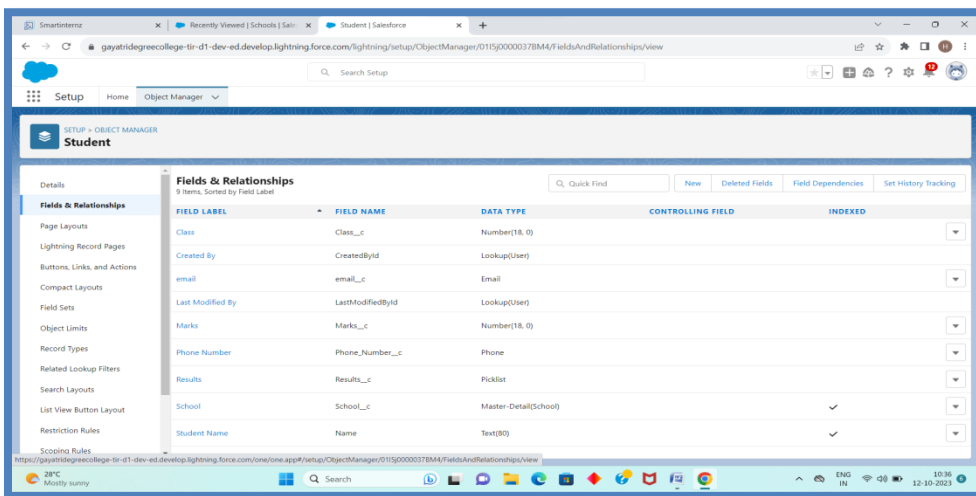

Note- Follow above steps 1 to 5 to create field and then follow below steps

1. Select the Phone as the Data Type, then click Next.
2. For Field Label, enter Phone Number.
3. Click Next, Next, then Save & New.

Creation Of Fields For The Student Objects

Note- Follow above steps 1 to 5 to create field and then follow below steps

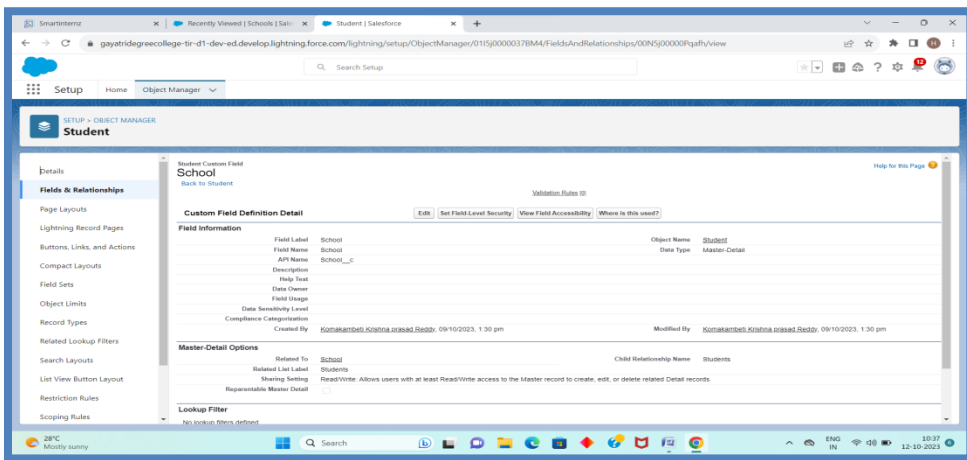

1. Select the Phone as the Data Type, then click Next.
2. For Field Label, enter Phone Number.
3. Click Next, Next, then Save & New

Let's create a master-detail relationship with School object

Note- Follow above steps 1 to 5 to create field and then follow below steps

1. Select Master-Detail Relationship as the Data Type and click Next.
2. For Related to, enter School.
3. Click Next.
4. For Field Label, enter School.
5. Click Next, Next, Next and Save.

Let's create a Pick-List field:

Note- Follow above steps 1 to 5 to create field and then follow below steps

1. From Setup, click Object Manager and select Student.
2. Click Fields & Relationships, then New.
3. Select Picklist as the Data Type and click Next.
4. For Field Label enter Results.
5. Select Enter values, with each value separated by a new line and enter these values:
6. Pass
7. Fail
8. Click Next, Next, then Save & New

Let's create a Number field:

Note- Follow above steps 1 to 5 to create field and then follow below steps

1. Select the Number as the Data Type, then click Next.
2. For Field Label, enter Class.
3. Click Next, Next, then Save & New
4. Follow steps 1 through 3 and create one more number field with Marks as the field labels.

Let's create Roll-up summary fields on School Object to calculate the number of students

1. Click gear icon Select Setup, This launches Setup in a new tab.
2. click Object Manager
3. Select School.
4. Click Fields & Relationships
5. Click New.
6. Select the Roll-up summary field as data type
7. Enter the field label as Number of students
8. Click Next
9. Then select the master object summarized as students
10. Select count as roll-up and then click Next, Next and save.

The screenshot shows the Salesforce Setup interface for a custom field named 'Number of students' on the 'School' object. The page is titled 'School Custom Field: Number of students' and includes a 'Back to School' link. The left sidebar shows the 'Fields & Relationships' section selected. The main content area is divided into two sections: 'Custom Field Definition Detail' and 'Roll-Up Summary Options'.

Custom Field Definition Detail

Field Label	Number of students	Object Name	School
Field Name	Number_of_students		
API Name	Number_of_students__c		
Description			
Help Text			
Data Owner	School Custom Field: Number of students - Salesforce - Developer Edition		
Field Usage			
Data Sensitivity Level			
Compliance Categorization			
Created By	Komakambeti Krishna prasad Reddy, 09/10/2023, 1:34 pm	Modified By	Komakambeti Krishna prasad Reddy, 09/10/2023, 1:34 pm

Roll-Up Summary Options

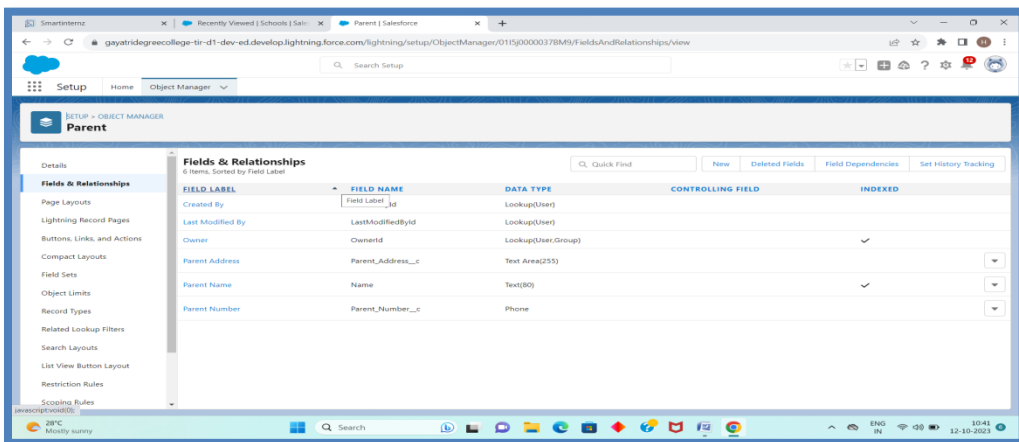

Data Type	Roll-Up Summary	Summary Type	COUNT
Summarized Object	Student		
Filter Criteria			

Create one more rollup summary field-

- From Setup, click Object Manager and select School.
- Click Fields & Relationships, then New.
- Select the Roll-up summary field as data type
- Enter the field label as Highest Marks

- Search School Management App & click on it.
- Click on Reports Tab.
- Click on School with Students report and see records

Milestone – 09:Triggers

Write A Trigger

write a trigger whenever the school website is null you should be unable to delete the record.

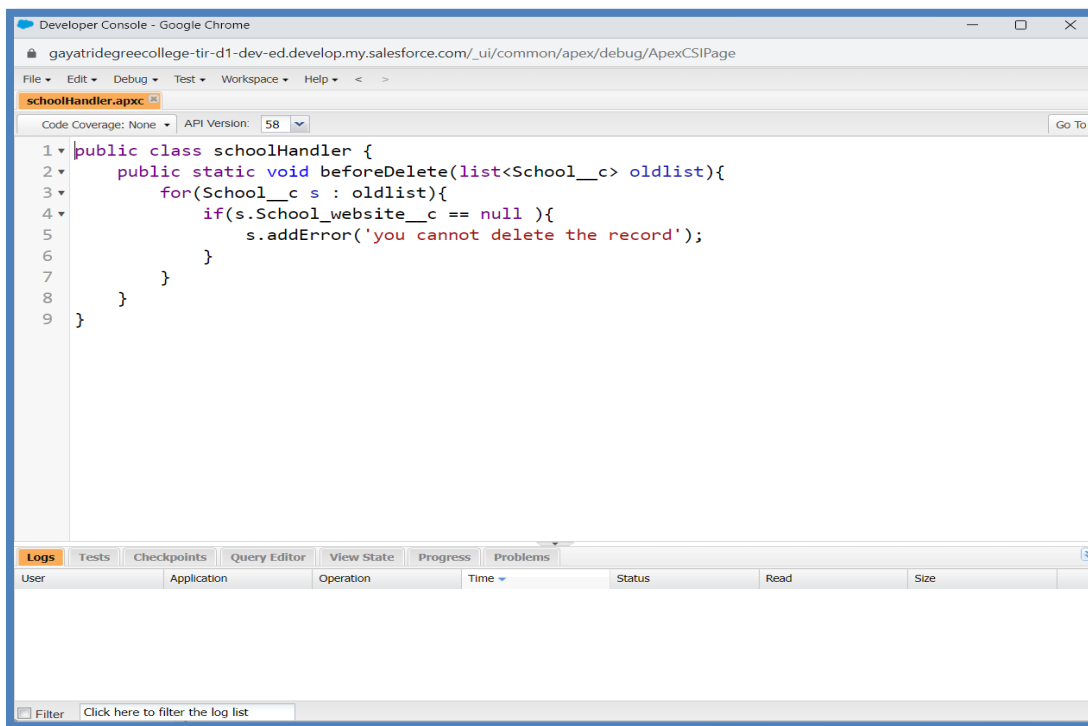

Go to the gear icon and select the developer console.

From the menu bar click on file and select Apex class.

Now give the class name as schoolHandler

Now Write the below code

```
public class schoolHandler {
    public static void beforeDelete(list<School__c> oldlist){
        for(School__c s : oldlist){
            if(s.Schoolwebsite__c == null ){
                s.addError('you cannot delete the record');
            }
        }
    }
}
```

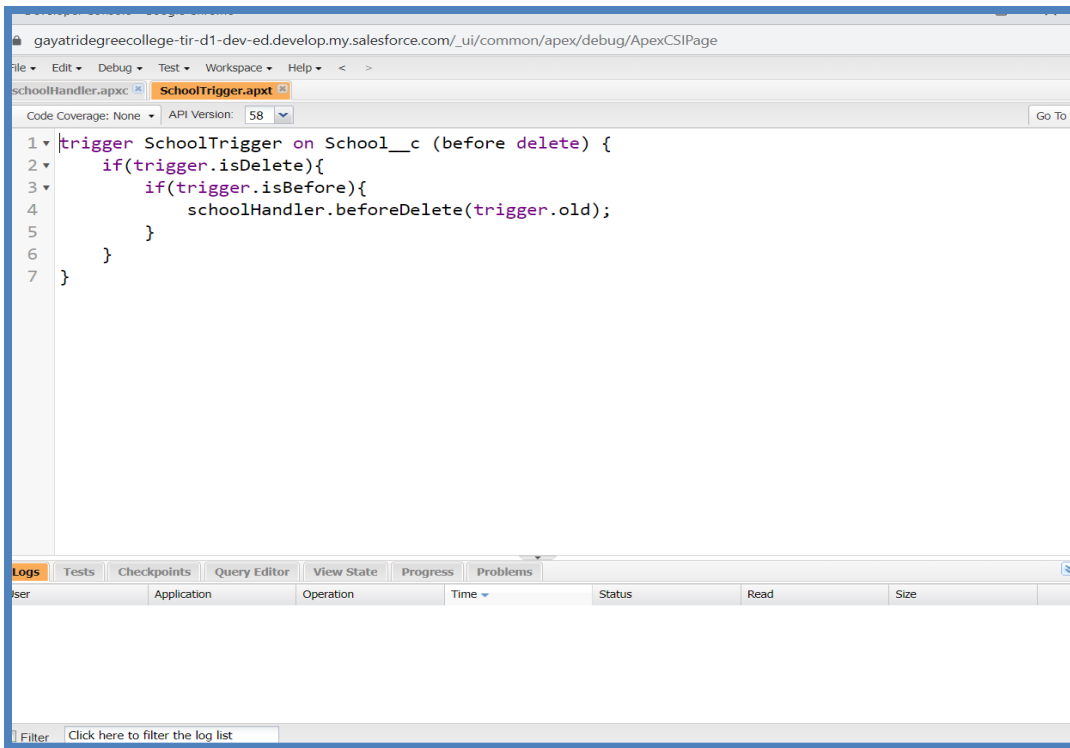

From the menu bar click on file and select Apex trigger.

Now give the trigger name as Internalmarks

Now write the below code

```
trigger SchoolTrigger on School__c (before delete) {  
    if(trigger.isDelete){  
        if(trigger.isBefore){  
            schoolHandler.beforeDelete(trigger.old);  
        }  
    }  
}
```

Milestone – 10: Flows

Create Flow

Create a record triggered flow whenever a student record is created it must send the email to the student about their welcome.

Click on Gear icon and select setup

In Quick find Box enter flow and select the flows

Click on New flow and Select Record triggered Flows.

In the search bar type student and click done.

Select (+)

type action and type email as follows.

Enter the following details

Label:Student Record Creation

Api Name:Student_Record_Creation(Auto-pupulated)

Body: Hi {!\$Record.Name} , we are happy to inform you that you have joined in our {!\$Record.school__r.Name}.

Subject: Record Creation

Recipient email Address:{!\$Record.Email__c}

click on done and Click on save

Flow label:Student flow

Flow API Name:Student_flow

and then click Activate.

The screenshot displays the Salesforce Flow Builder interface for a flow named 'student flow - V1'. The browser address bar shows the URL: `gayatriegreecollege-tir-d1-dev-ed.develop.lightning.force.com/builder_platform_interaction/flowBuilder.app?flowId=3015j000001tnY1AAI`. The interface includes a top navigation bar with 'Flow Builder' and 'student flow - V1'. Below this, there are tabs for 'Select Elements', 'Auto-Layout', and 'Version 1: Active—Last modified 2 days ago'. Action buttons for 'Run', 'Debug', 'View Tests', 'Deactivate', 'Save As', and 'Save' are visible. The main workspace shows a flow diagram starting with a 'Start' node (Record-Triggered Flow). A tooltip for the 'Start' node displays: 'Object: Student', 'Trigger: A record is created', and 'Optimize for: Actions and Related Records'. Below the 'Start' node is a 'Run Immediately' node, followed by a 'Student Record Creation' action node (lightning bolt icon), and finally an 'End' node (red square icon). The bottom of the screen shows a Windows taskbar with the date '12-10-2023' and time '10:51'.

THE END
